**Sample Statement/Question:**

Budget Analysts must analyze complex technical data and other information using logic and quantitative reasoning abilities.

**Sample Accomplishment**

As a management analyst at Smythe-Jones, Inc. (April 1974 to July 1975), I established statistical formulas for new computer programs. The formulas were to provide statistical indices for measuring the schedule and cost effectiveness of various installations and contractors. Using available data elements, I developed formulas that provided indices showing schedule status in terms of dollars worth of work, cost status and function of schedule status, and trend projections for anticipated costs at completion based upon performance to date.

These formulas were subsequently incorporated into the computer programs, which were provided to operating officials on a monthly basis. Based on the indices produced, I was able to project a significant cost overrun for a major contractor on its largest contract. The contractor denied the problem would overrun but the next three months showed the indices to be correct. The contractor then admitted there would be a significant overrun.

Eighty-five percent of this accomplishment was my work. Mr. John Adams (supervisor), 301 Spring Street, San Francisco, California can verify this accomplishment. His telephone number is 415-555-3461.
